

## CORPORATE OVERVIEW

# The leading independent provider of image and information management solutions

**A**MICAS, Inc. is focused exclusively on providing comprehensive image and information management solutions to healthcare providers. With more than 30 years of industry experience, AMICAS works closely with physicians, imaging executives, technologists, and other healthcare professionals on solutions to address the inherent complexities of the practice of imaging.

AMICAS' solutions, installed at more than 1,000 acute and ambulatory healthcare facilities, are processing more than 100 million imaging transactions annually and providing secure access to petabytes of storage. AMICAS remains focused on continuing to develop cutting-edge, next-generation software solutions to support the complex challenges our customers face.

As the leading independent provider of imaging IT solutions, AMICAS offers the industry's most comprehensive suite of image and information management solutions – including radiology PACS, cardiology PACS, radiology information systems, hemodynamic monitoring systems, revenue cycle management solutions, and enterprise content management tools designed to power the imaging component of the electronic medical record (EMR).

AMICAS' solutions are designed to work together as a tightly integrated suite or as modular components within an overall IT infrastructure. Our customers typically realize a solid return-on-investment within a relatively short timeframe – that, and the productivity gains our customers experience, can have a profound impact on their ability to grow.

As a pioneer in top-flight automation solutions, AMICAS continues to lead the industry in innovation. AMICAS provides a complete, end-to-end solution – including RIS, PACS, and revenue cycle management – for radiology practices, imaging centers, and ambulatory care facilities. Hospitals and integrated delivery networks are provided with a comprehensive image management solution for cardiology and radiology that supports EMR strategies to enhance clinical, operational, and administrative functions.

AMICAS is headquartered in technology-rich Boston, MA. The AMICAS office in Daytona Beach, FL, serves as the primary customer support and training center. Whereas the AMICAS offices in Hartland, WI, and Ottawa, ON, offer additional product development and support capabilities.

At the core of today's AMICAS is a total commitment to customer success, innovation, and growth. With more than 1,000 customers, AMICAS is one of the largest providers of comprehensive imaging IT services and solutions.

**“With AMICAS, we have grown our exam volume by 20 percent while decreasing our operating expenses by 10 percent.”**

**Randy Hicks MD, MBA**, radiologist and owner  
Regional Medical Imaging (Flint, MI)

### AMICAS PACS™

Powering patient-centric reading and workflow

### AMICAS VERICIS™

Driving cardiology productivity and quality

### AMICAS Hemodynamics™

Providing easier data collection and clinical display

### AMICAS ECM™

Driving imaging interoperability and access

### AMICAS RIS™

Driving productivity through enhanced workflow

### AMICAS Financials™

Increasing collections and improving productivity

### AMICAS Reach™

Simplifying results distribution

### AMICAS RadStream™

Managing critical results and reducing interruptions

### AMICAS Dashboards™

Providing on-demand business intelligence

### AMICAS Documents™

Boosting productivity through paperless operations
