

Driving productivity through enhanced workflow AMICAS RIS™

AMICAS RIS is a robust, feature-rich RIS that provides unrivaled levels of productivity and workflow for ambulatory care practices, imaging centers, radiology group practices, and hospitals. A 100 percent Web-based solution, AMICAS RIS offers innovative features that help imaging businesses increase their revenue stream while lowering costs.

DISCOVER PRODUCTIVITY

AMICAS RIS was designed from the ground up to make your staff as productive as possible. Highlights include:

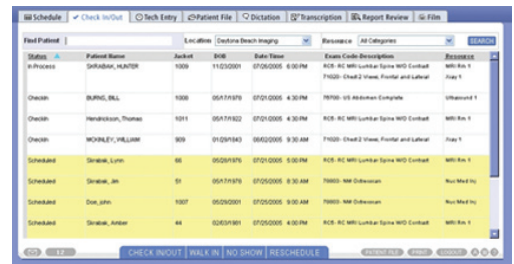

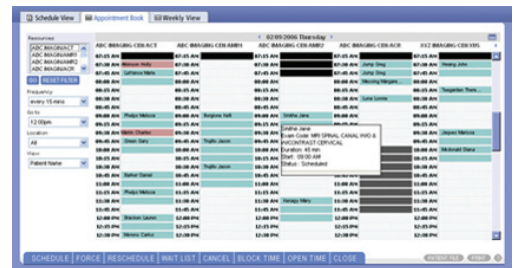

- + World-Class Scheduling Capabilities — including “drag-and-drop” scheduling, multi-resource scheduling, bundled procedure exam scheduling, and scheduling by patient or exam type
- + Intrinsic Pre-Authorization and Eligibility Management — improve your collections from payers while improving schedule management and resource utilization through pre-authorization and eligibility worklists.
- + Outstanding Core RIS Functionality — featuring best-in-class charge capture, patient flow monitoring, mammography tracking, as well as the ability to fax and e-mail results to referring physicians
- + Operational Visibility and Analytics — with AMICAS Dashboards™, AMICAS RIS offers excellent operational visibility through a Web-based tool that provides real-time access to key business metrics, paired with sophisticated analytics tools and graphical dashboard presentation.
- + Ease of Installation and Maintenance — as a 100 percent Web-based solution, AMICAS RIS requires no client installation. This results in incredible speed and grace for overall system management. In addition, all software updates and upgrades take place at the server level, which provides centralized management of the system.
- + AMICAS RIS — when tightly integrated with AMICAS Financials™, AMICAS PACS™, and AMICAS Documents™ — provides the industry’s only comprehensive end-to-end suite of radiology software solutions based fully on modern technologies.

DESIGNED FOR THE REAL WORLD

With over 200 installations across the United States, AMICAS has

“We looked at all the options on the market and chose AMICAS because of their product’s flexible and powerful scheduling capability. Given AMICAS’ powerful Web-based technology and superb reputation for helping their customers succeed — it was an easy decision to make. We’ve been extremely pleased with our choice.”

Sandy Drevenik, business manager
Valley Open MRI (Kingston, PA)

Web-based architecture that’s developed 100 percent in Java

one of the industry's largest and most diverse RIS client bases. The breadth of this installed base provides a tremendous resource for innovating and enhancing AMICAS RIS.

The result is a system design that reflects the needs of the marketplace: comprehensive functionality, easy-to-read screens, easy-to-use features, and an easy-to-learn system with a familiar graphical user interface. Because of AMICAS RIS' elegant system design, new users will require less training, while experienced users can quickly enhance their productivity.

DISCOVER PRODUCTIVITY

AMICAS RIS is a feature-rich solution, offering the most comprehensive suite of functionality in the market. At AMICAS, we believe that the information systems needs of the outpatient and hospital markets are quite complex. While some solutions offer a "mini RIS" or "scheduling module," AMICAS RIS is a fully functional RIS solution, which provides:

- + Complete patient registration
- + Comprehensive centralized scheduling that supports multiple or single-site selection — which includes multi-view scheduling, as well as "drag-and-drop" scheduling
- + Advanced work queues to optimize order entry, scheduling, pre-authorization, eligibility, check-in, and tech entry workflows
- + Excellence in integrating with third-party systems for billing, reporting, etc.
- + Patient flow monitoring
- + Intrinsic reporting via the Voice Capture module
- + Transcription and physician review using Microsoft Word
- + Automatic report completion for normals
- + Online physician report approval and electronic signatures
- + Automatic fax and e-mail delivery of reports to referring physicians
- + Charge capture
- + Film and mammography tracking
- + Extensive user role security and user configuration

AMICAS RIS

DRIVING PRODUCTIVITY THROUGH
ENHANCED WORKFLOW

“The support team is phenomenal. When you call, you’re going to speak to a real person (not an automated voicemail) and have your issue taken care of within minutes. I’m very pleased with the way support handles our cases and how quickly they get back to us. AMICAS RIS is so ‘user-friendly’ for our employees. We’re looking forward to our next upgrade!”

Vicki Combs, practice manager
The Radiology Clinic, LLC
(Tuscaloosa, AL)
